

Downloading ALOS World 30m data

1. Go to website:
<https://portal.opentopography.org/raster?opentopolD=OTALOS.112016.4326.2>
2. Scroll down to the map. Zoom into your area of interest
3. Click select a region. This will allow you to specify your domain that you want to download.

4. Click and drag to select your region.

5. Scroll down to get the coordinates of your domain and make sure that the size of the domain is below 450,000 km². There will be a warning if the domain is too large.

1. Coordinates

Horizontal Coordinates: WGS84 [EPSG: 4326]
Vertical Coordinates: WGS84 Ellipsoid/EGM1996 Geoid [EPSG: 5773]
Units: meter
Data Selection Coordinates (Select an area on map)
 $X_{\min} = 38.318115133792155$ $Y_{\min} = 22.103962762541244$ $X_{\max} = 44.77807674184441$ $Y_{\max} = 26.71224805972227$
☐ Manually enter selection coordinates (in the horizontal coordinate system listed above)

Current selection area is approximately 335,091 km².

6. Select “GeoTiff” as the output data format. Additional raster visualization outputs are offered, but not needed.

2. Data Output Formats

Select Data Output Format: GeoTiff

Core Services

3. Raster Visualization

Visualization type:
☐ Hillshade
☐ Color-relief
☐ Color hillshade
☐ Slope
☐ Aspect
☐ Roughness

7. Enter your email address on the bottom of the page and click submit. This will bring you to another page to wait while your data is being processed.
8. When the data is prepared, a link will appear at the bottom of the page. Click to download.
